

## Custom Pultruded FRP Products for a Power Generation Plant

### Custom FRP

1

Our custom FRP products for this job included an anti-skid surface. Our FRP

pultruded products are strong, lightweight, durable, and will not spark, spall, rot, or decay.

2

We have the capacity, capabilities, and technical know-how to provide custom FRP components with precision-tailored to your needs. More importantly, we go the distance to make sure we exceed your expectations in terms of quality and service.

**Opportunity:** Customer needed a permanent material solution that would replace an existing metal and wood scaffolding maintenance platform at their power generation facility. This was a structural upgrade that needed to take into consideration maintenance access and safety.

**Solution:** Beetle provided FRP stair-towers, railings, and platform grating that would interface into the existing plant layout while utilizing existing steel support. Our FRP pultruded products are a pre-engineered, modularized design that offers long life cycles, ease of installation, and cost-effectiveness.

**Comments:** We provide a wide range of custom pultruded FRP products that are suitable for many harsh industrial applications. We have CNC capabilities that make meeting your design requirements simple. Our FRP pultruded products included decking, grating, stairs, stair towers, railings, ladders, cages, fencing and more.
